

# EA Installation Guide

## Overview

Complete walkthrough for downloading, installing, activating, and verifying an EA on MetaTrader 5.

## Prerequisites

MetaTrader 5 installed, funded MT5-compatible broker account, active EA license, stable internet connection.

## Step 1 - Download

Login to the dashboard ? Products & Licenses ? Download EA (.ex5).

## Step 2 - Install

Open MT5 ? File > Open Data Folder ? MQL5 > Experts ? Move EA file ? Restart MT5.

## Step 3 - Activate

Open recommended chart, drag EA from Navigator, allow algo trading, paste license key, click OK.

## Step 4 - Verify

Look for smiley face, green AutoTrading button, no errors in Experts tab, initialization message visible.

## Troubleshooting

If smiley missing enable AutoTrading. Invalid license: verify key. EA not trading: market closed, spread high, balance low, wrong symbol/timeframe.
