

# Troubleshooting Guide

## Goal

Resolve common installation, activation, and trading issues quickly.

## EA Missing

Place file in MQL5/Experts and restart MT5.

## EA Not Loading

Enable AutoTrading, check Tools > Options permissions, confirm symbol/timeframe.

## Invalid License

Re-copy key, remove spaces, confirm license assigned to account.

## No Trades

Market closed, spread too high, insufficient balance, lot size too large, trading disabled.

## MT5 Freezing

Too many charts, heavy indicators, weak hardware. Close extras or use VPS.

## EA Stopped

Internet drop, VPS reboot, broker downtime, equity protection triggered. Check Experts tab.
